OBJECTIVE

To focus on the study of domain-related cases using the workshop format as a research methodology. In these studies, the workshop is, on one hand, authentic, as it aims to fulfil participants' expectations to achieve something related to their own interests. On the other hand, the workshop is specifically designed to fulfil a research purpose: to produce reliable and valid data about the domain in question. This program will be covering strategies for developing a research agenda, identifying and analyzing funding opportunities, understanding funding agencies, creating a funding plan, and recruiting mentors and collaborators. To make the participants aware about LATEX. By the end of the workshop, the participants will be confident enough to do their documents using LATEX
