

## ECOCLUB REPORT

(Activities on 26 Jan 2018)

***“Every little steps count; we have made a small beginning.”***

ECOCLUB formed in 2013 has executed some of the many activities planned for the academic year 2017-18 on the auspicious occasion of Republic Day 26<sup>th</sup> Jan 2018.

To spread awareness about global and local environment issues and in order to educate students on the link between man and environment, Student members of Ecoclub performed a street play which showcased various issues including pollution, deteriorating condition of environment, overuse of natural resources and water conservation.

Students stretched their imagination and turned their ideas into creative art by using old newspapers and used bottle to decorate one of the walls of college building. The idea of making “Best out of Waste “empowered the students to become active contributor in understanding our environment by implementing the 3R principle. Reduce Reuse and Recycle. Students also hanged placards with save environment message on the trees.

Members of Ecoclub organized tree plantation drive and planted herbal and medicinal plants in the college premises. The tree plantation drive was flagged off by planting medicinal plants by honorable General secretary Sr. Adv Appasaheb Desai, Executive trustee Adv Prahlad Desai, Principal Dr Alam Shaikh and Head of Humanities and Basic science department Mrs vibhavari kulkarni.

The ecoclub works with perseverance and determination to shape the future generation to think and act green. This year the Ecoclub committee has taken a novel initiative of observing “save fuel Day” on 30 Jan 2018. An appeal was made to all the students and faculty to use exclusively public transport on 30 Jan 2018. Student members have sent a survey form to all the members of PVPP to know about their means of travelling from their home to college and their willingness to use public transport. We got overwhelming response from everyone which initiated us to observe “Save Fuel day “

All in all, It was a wonderful event for a great cause. The motive of our ECOCLUB is to spread awareness about the environment amongst students so as to create clean and green surrounding for all to live in. We hope to continue doing this good work and paving the path for a sustainable future.
