Rolling substitutions are allowed.

Start and Restart of Play. A kick-off starts play at the start of the match or after a goal. A kick-off involves one player kicking the ball, from stationary, forward from the centre spot. All players must be in their own half prior to kick-off. Fouls/Misconduct. These are many and varied, broadly speaking it is an offence to use excessive force whilst playing the game either deliberately or undeliberately or to handle the ball (unless you are a goal keeper). The referee may show the yellow card to caution players for less serious offences and the red card for more serious offences resulting in the player being sent off. Two yellow cards are equivalent to one red card.

Free Kicks. Are given by the referee for fouls and misconduct. A free kick can either be direct or indirect. A goal can be scored directly from a direct free kick. A goal can only be scored from an indirect free kick if it touches at least one other player first. The free kick must be taken from a stationary position with that position varying depending on whether the free kick was given inside or outside the goal area and whether it's direct or

PADMABHUSHAN VASANTDADA PATIL PRATISHTHAN'S COLLEGE OF ENGINEERING.

indirect.

Penalty Kicks. Are given against a team when they commit an offence which would normally be awarded a direct free kick inside their goal area. The ball is kicked from stationary from the penalty spot

Throw-in. Used to restart play after the whole of the ball has crossed the touch line.

goal kick. Used to restart play after a goal has been scored.

Corner Kick. Is given when the whole of the ball crosses the goal line and was last touched by a member of the defending team (and no goal was scored). A corner kick is taken from inside the corner arc closest to the point where the ball crosses the goal line.

BASKETBALL

PADMABHUSHAN VASANTDADA PATIL PRATISHTHAN'S COLLEGE OF ENGINEERING.

The ball can only be moved by either dribbling (bouncing the ball) or passing the ball. Once a player puts two hands on the ball (not including catching the ball) they cannot then dribble or move with the ball and the ball must be passed or shot.

Two points are awarded for each successful throw, except for throws from outside the three point line (3 points), or for penalty free throws (one point).

In case of equal points, tie breaker will be implemented of a quarter (5mins), extra time of 2 mins will be provided or free shots.

A player is disqualified and removed from play after 5 personal fouls (6 in the NBA).

A player fouled while shooting is awarded 2 free throws if the shot misses. If the fouled offensive player is not shooting, the team gets possession out-of-bounds nearest where the foul occurred.

The defensive team gets possession of the ball when the offensive team commits the foul. An intentional foul results in 2 free throws.

CARROM

Scoring: The player who pockets all the carrom men wins the game.

Queen= 3 points Carrom men:1 point

1. Arrange the carrom men with the red "queen" in the center and the whites should be lined up to form a "Y" around the "queen" and blacks to replace the empty spaces around the "queen" and the whites.
2. Each player sits on his/her side of the board and be allowed to only strike from that side.
3. The contestant playing white 'breaks' or plays first, which also can be decided by the toss of a coin.
4. Your turn continues as long as you keep sinking your pieces- luck shots count and all combinations are permitted.
5. The red piece, or 'queen', can be pocketed at any time after sinking your first piece but must be sunk before your last one. After pocketing the queen, you must sink one of your piece, thereby "covering" it, into any pocket in the next shot or it is returned to the center spot.
6. Once the queen is covered, whoever clears their pieces first win the 'board'.

* Sinking the striker costs you one piece and your turn. But, if you sink a piece in

PADMABHUSHAN VASANTDADA PATIL PRATISHTHAN'S COLLEGE OF ENGINEERING.

the same shot, then two come up and you shoot again.

* After sinking the striker, your opponent places the due piece(s) within the center

Circle. If you haven't sunk one yet, you owe one.

* If while shooting for the queen you also sink one of your pieces, the queen is

Automatically covered, no matter which went first.

* If a piece jumps off the board, it is placed on the center spot. If pieces land on

End or are overlapping, they are left that way.

* If the center spot is partially covered when replacing the queen or a jumped

Piece, the piece should cover as much red as possible. If totally covered, the

Piece is placed opposite the next player behind the red spot.

* If you sink your opponent's piece, you lose your turn. If you sink their last piece,

You lose the board and three points.

* If you sink your last piece before the queen, you lose the board, three points

And one point for each of your opponent's pieces left.

PADMABHUSHAN VASANTDADA PATIL PRATISHTHAN'S COLLEGE OF ENGINEERING.

* If the striker does not leave both lines, go again. You get three tries to break

Before losing your turn.

TABLE TENNIS

- A game of table tennis is played up to 11 points.
- The one to win by toss or other method will have 2 choices:1. Choose who serves 2. Choose which end he prefers to play
- While serving, the ball must rise at least 16cm behind the server's end line & must be visible to opponent n umpire.
- Each player has two serves each
- If the ball touches the net and still bounces on your opponent's side of the table, the service must be replayed. However, if the ball touches the net and does not bounce on your opponent's side of the table, the server loses the point.
- Service continues to alternate between opponents until one player scores 11 points, unless both players or pairs score 10 points (called deuce).If both players reach 10 points, then service alternates after each point, until one player gains a 2 point lead.
- In doubles, the serve must be played diagonally, i.e. within the right half courts only, whereas in singles you can serve from and to, any part of the table.
- The umpire will only give you 1 warning during a match. So if any of your subsequent serves in that match are of doubtful legality, for the same or any other reason, your opponent will be awarded the point.

PADMABHUSHAN VASANTDADA PATIL PRATISHTHAN'S COLLEGE OF ENGINEERING.

-If you allow the ball to bounce more than once on your side of the table at any time, you lose the point.

-The receiver can stand wherever they want and can play their returns from any position. However, players are not allowed to touch the table with their free hand (the hand not holding the racket) and they are not allowed to move the table.

-When playing doubles, each player still has two serves and the service still alternates every two points between sides, but it also alternates between players on the same team. At the end of every two points, the receiving player becomes the server, and the partner of the serving player becomes the receiver.

- Imagine two teams A & B and X & Player A serves to player X who then returns the ball. Player B must then play the next shot and player Y must play the next shot. The same sequence must then be repeated (A, X, B, Y) until the point is decided. If you hit the ball out of sequence, you lose the point.

- In the last possible game of match, as soon as 1 team has scored 5 points, the teams must change ends and the receiving pair must change their order of receiving. For example, if A & B score 5 points first, whilst A is serving to X, after changing ends, player A will serve to player Y for the remainder of the game.

-A player loses a point if he:

1. Throws the ball in the air and failing to hit the ball or failing to hit it onto his & his opponent's side of the table)
2. Allows the ball to bounce twice on his side of the table

PADMABHUSHAN VASANTDADA PATIL PRATISHTHAN'S COLLEGE OF ENGINEERING.

3. Does not hit the ball after it has bounced on his side of the table
4. Hits the ball before it has bounced or hits it twice in succession
5. Puts his non-playing hand on the table or net or moves the table, obstructs the ball with any part of his body or clothing
6. Hits the ball out of turn when playing doubles

CHESS:

Setting up the board: The board should be set up with the white square in the nearest row on the right, "white on the right". If this isn't done the king and queen will be mixed up. Shake hands across the board before the game starts. White always moves first. Ranks and files: Going from left to right, the vertical

rows on the board, called files, are labeled a through h. The horizontal rows, called ranks, are numbered 1 to 8. The 1 is white's side of the board; 8 is black's side. This system can be used to show what square a piece is on in a way like the game Battleship. When the board is set up the square a1 will be on the white player's left side.

Pieces and how they move: In our club, once you move a piece and take your hand off it, you cannot

change your move, unless your opponent lets you, which they do not need to do. However, you may

touch a piece, consider a move, and put the piece back in its original position, as long as you don't take your hand off of the piece during the process.

PADMABHUSHAN VASANTDADA PATIL PRATISHTHAN'S COLLEGE OF ENGINEERING.

Pawn (P): White pawns start on rank two, black pawns on rank 7. The first time a pawn is

moved it can move forward either one or two ranks. It cannot jump over another piece. After it

has moved once, whether it has moved up one or two, a pawn can only move one square

forward at a time, and it cannot move backward. If a pawn advances to the end rank (8 for white, 1 for black) then it is promoted, which means it is exchanged for any other piece, with the exception of a king or another pawn. No pieces are moved from the chessboard itself; in this way a color can have two (or more!) queens at the same time. The pawn's "value" is 1.

Knight (N): Knights move in an L-shaped pattern. A knight moves one square over and two squares up, or two squares over and one square up, one square over and two squares back, etc. as long as the same shape and size of the jump is maintained. The knight is the only piece that can jump over other pieces; it jumps straight to a square without disturbing any of the pieces in between. Knights are generally brought out early, and this is good. The knight's value is 3.

Bishop (B): The Bishop moves diagonally, any distance along a diagonal, without jumping over any pieces. A bishop that starts on a black square will always be on a black square, so it can only get to half the squares on the board. The bishop's value is 3.

Rook (R): The Rook moves in a straight line in any direction, as many spaces as it likes, without jumping. Rooks shouldn't usually be used until later in the game, and should almost never be brought out at the beginning, because they will be harassed by pawns and other pieces, wasting time for the player who brought out the rook. This piece might also be lost by being

PADMABHUSHAN VASANTDADA PATIL PRATISHTHAN'S COLLEGE OF ENGINEERING.

brought out early, which is bad because the rook is valued at 5.

Queen (Q): The Queen is the most powerful piece, as it can either move diagonally or in a straight line, which makes it like a bishop and rook put together. The queen cannot move like a knight. When the board is set up the queen always starts on her own color, so the white queen always starts on a white square. The queen is worth 9 points because she can move to so many places on the board so quickly.

King (K): The most important piece on the board is the King. The king can move one and only one space at a time, in any direction (left, right, forward, backward, and diagonally). The capture of the king is the object of the game. Capturing, check, and the end of the game The game will be played using timers. Each player will be provided with a timer and after playing their move, the player is supposed to set the timer for their opponent. So that each player gets one minute for each move and the game isn't extended unnecessarily.

- **Capturing:** A piece captures an opponent's piece by moving onto the square occupied by the opponent's piece. That piece is removed from the board and replaced by the capturing piece. Knights, Bishops, Rooks, Queens, and Kings capture by moving in their normal way. The pawns capture differently, by moving one square diagonally, either to the right or left, onto the

piece to capture. They cannot capture by moving straight forward. At no time may more than one piece stay in any square, and pieces cannot capture a piece of the same color.

- **Check and Checkmate:** When a piece would be able to capture the opposing king on the next turn, the king is said to be in check. The king in danger must get out of check on the next turn, either by moving out of the way, blocking the check with another piece, or by capturing the

PADMABHUSHAN VASANTDADA PATIL PRATISHTHAN'S COLLEGE OF ENGINEERING.

attacking piece, whatever removes the threat. It is illegal to move your king into check, so, for instance, you can't move your king next to the opponent's king. The goal of the game is to put the opposing king in checkmate, which means he is in check and cannot be saved by any of the ways of escaping check. At this time the game is over, with the player whose king cannot escape check losing. The first player to get the opponent's king wins; if white checkmates black, black has lost, even if the black player could have checkmated white on the next move. If you see that you are going to lose, you can resign by knocking over your king, gently!. After checkmate or a resignation, shake hands across the board with your opponent and congratulate him or her on a good game.

- **Draws:** If a king is not in check, but no legal move can be played without putting the king in check, then the game is a stalemate, which is a tie, or draw. This usually happens when a player has only a king left and the other player, with many pieces left, creates a position in which the king cannot move but is not threatened. Another way to draw is if both players move 50 times in a row (a total of 100 moves) without capturing a piece or promoting a pawn. Players may also agree on a draw when they see it coming; to do this, extend your hand over the board, to shake hands, and say, "I offer a draw." If the opponent shakes your hand, it's a draw. The opponent does not need to accept! They may think they can win.

Special moves:

- **Castling:** If both the king and a rook have not been moved yet during the game, there are no pieces between them, and the king is not in check, then the king and rook can move in a special way called castling: the king moves two spaces toward the rook, and the rook moves to the other side of the king, right

PADMABHUSHAN VASANTDADA PATIL PRATISHTHAN'S COLLEGE OF ENGINEERING.

next to the king. Often, this puts the king in a more protected position, behind some pawns. The king cannot castle out of, through, or into check. He cannot move through a square threatened by an enemy piece.

- Capturing en passant: en passant is a special way a pawn can capture another pawn. It is French for “in passing,” which is helpful to know because the rule applies to a pawn which has just moved up two spaces, skipping over the square threatened by the opponent’s pawn. Here is an example: a black pawn is on b4. The white pawn on c2 has not moved yet. On white’s turn the pawn on c2 is moved to c4, evading capture by the pawn on b4. But the pawn on b4 has the option, for one turn only, of capturing the white c-pawn. The black pawn moves to c3, and the white pawn is taken off the board. If black chooses not to capture immediately, then the chance is lost, and black may not capture en passant at a later time. En passant is always a one-turn chance for a pawn to capture a pawn which has evaded capture by moving up two spaces on its first turn. It does not apply to any other positions and only concerns pawns

CONCLUSION

TO CONCLUDE THIS YEARS SPORTS FESTIVAL WAS A GREAT SUCCESS IN FINDING THE TALENTS BEHIND THE CURTAIN IN STUDENTS AND REFRESHING THEIR MIND BEFORE THE START OF ACADEMIC YEAR.

WE FOUND QUALITY PLAYERS THAT CAN REPRESENT OUR COLLEGE AT VARIOUS INTER-COLLEGE UNIVERSITY SPORTS COMPETITIONS.

WE HAVE FOUND OUR WEAKNESSES AND OUR STRENGTH AND THE IMPROVEMENT REQUIRED FURTHER IN OUR ORGANIZING AND MODIFICATION NEEDED FOR SMOOTH CONDUCTING OF SPORTS FESTIVAL IN FUTURE.

PADMABHUSHAN VASANTDADA PATIL PRATISHTHAN'S COLLEGE OF ENGINEERING.

STRENGTH AND WEAKNESS OF SPORTIVO 2016

STRENGTH:

AN ONLINE FACEBOOK PAGE WAS MADE FOR CONSTANT UPDATES REGARDING THE FEST.

A CHANGE IN RULES WERE MADE FOR TUG OF WAR AND CHESS. DODGEBALL WAS SCRAPPED SINCE IT CAUSED LOTS OF ISSUES.

WE HAD SOME NAIL BITING CLOSE COMPETITIONS. BOYS AND GIRLS BOTH SHOWED A GOOD PARTICIPATION IN ALL THE SPORTS EVENTS. THEY PLAYED WITH TRUE PASSION AND SHOWED THE SPORTSMAN SPIRIT IN PLAYING IT IN A FAIR WAY.

PADMABHUSHAN VASANTDADA PATIL PRATISHTHAN'S COLLEGE OF ENGINEERING.

WEAKNESS:

WEAKNESSES ARE THE MILESTONES OF IMPROVEMENT.

WHERE FEW THINGS DID NOT WORK QUITE PROPERLY
NEED TO BE REVISED FOR SMOOTH FUNCTIONING OF
SPORTS FESTIVAL IN FUTURE.

TUG OF WAR RULES NEED TO BE REVISED WHICH
MADE AN ISSUE THIS YEAR.

THE EVERYDAY'S SCHEDULE WHICH IS MADE
SHOULD BE MANAGEABLE AND FOLLOWED STRICTLY
WHICH LACKED THIS YEAR.
