

Post Event Report

Name of the event: Tekrion

Date of the event: 25th January 2023

Location of event: CC Lab

Time: 2.00 p.m. to 5.00 a.m.

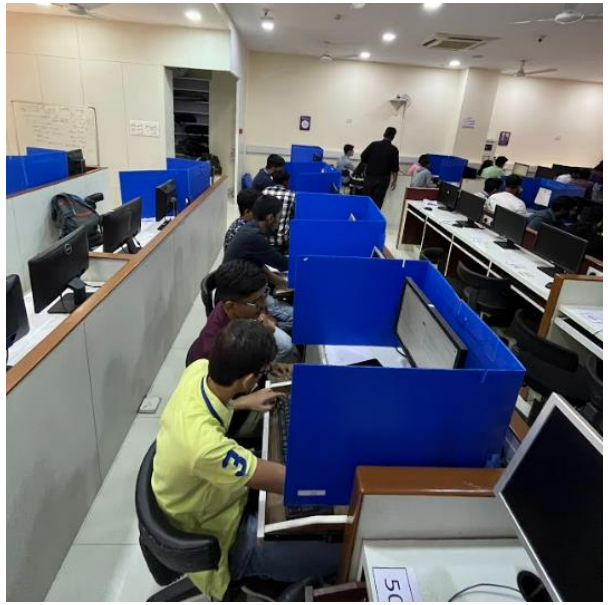

Sponsoring Organization: VPPCOE&VA

Event Summary:

Tekrion event was organized on 25th January 2023 by team ITSA, IT Department under the guidance of Dr. Pradip Mane, HOD of IT Department. There were 3 rounds in total in the event which were based on programming language such as C Programming, Java and Python. The first round was composed of codes where participated teams had to predict the output of the code without running it on the compiler. Next round was debugging round where debugging skills of students were analysed on the basis of the program given to every group. Last round was blind coding, where students were provided with two codes of their preferred language and later on they had to write the program based on the same logic of the codes provided to them.

We received a magnificent number of participation in this event. As this event enhances students' basic programming language concepts. **21 teams** with total **52 students** participated in the event. However, on the day of event 50 participants had participated in 1st round of the event and after 1st round of the event, 10 groups (20 students) were eligible for 2nd round and 5 groups (10 students) were eligible for the final round. Students of all departments had participated in this event. Participation in this event was commendable.

Winning team was from SE IT of participants Tanmayi Nandurkar & Ranjan Padhy, while the runner up team was from TE COMPS with the participants Anuraj Maurya & Mrunal Kotian. At the end of the event, all the faculty members were present in CC Lab to congratulate the winners. Dr. Alam N. Shaikh, our campus director awarded the winning and runner up team with the cash prize and the certificates. He further praised the ITSA team members that they had arranged this event in a very good way. He also explained the importance of research to the students present there. He also stated that event like Tekrion should be arranged frequently as such type of events promote the technical knowledge, skills and the logic building of the students.
