

Group Discussion on a subject Distributed Computing

Class: B.E. (Comp)

Sem: VIII (FH 2023)

Sub. In-charge: Aditi Warange

Brief of activity :-Group Discussion on a subject Distributed Computing for BE students for understanding of subject and to update their knowledge .

➤ Objectives of Group Discussion

1. To get familiar with the Distributed system model.
2. To acquire knowledge and skills for understanding concepts of different type of Distributed Computing.

➤ Expected Group Discussion Outcome

Participants will be able to:

1. Understand technical differences in various Distributed systems model.
2. Understand various applications of deadlock detection and distributed file system.

The group discussion program was organized between 17/04/2023 to 22/04/2023 on below topic,

1. Centralized and decentralized system
2. Centralized deadlock and decentralized deadlock
3. Conventional file system and distributed file system
4. Token based and non token based algorithm.
